Explanation of Examinations and Scoring

This *Guide to Test Interpretation* provides an overview of reporting for Arizona's Instrument to Measure Standards High School (AIMS HS). It is intended to help educators apply test report data to the needs of individual students and the district as a whole.

The Purpose of Testing

One of the principal purposes of a school testing program is to provide teachers with information to help students learn. Testing, or assessment, plays a vital role in today's education environment. Assessment results often are a major force in shaping public perceptions about the capabilities of our students and the quality of our schools. As a primary tool for educators and policymakers, assessment is used for many important purposes. Assessment results are used to help improve teaching and learning and to evaluate programs and schools. Assessment is also used to generate the data upon which policy decisions are made. Because of the important functions it performs, educational assessment is a fundamental activity in every school, district, and state. It is a vital complement to innovation, higher standards, and educational excellence.

AIMS HS is the result of many years of intense effort and collaboration among teachers, administrators, and the Arizona Department of Education. AIMS HS measures the student's level of proficiency in Writing, Reading, and Mathematics.

How Results Are Measured

Students are tested on the Writing, Reading, and Mathematics Standards. Each standard uses the format of levels—Strands, Concepts, and Performance Objectives. The Strands are identified subsets of a content area with Concepts attached to each Strand, and Performance Objectives attached to each Concept. Concepts are **broad statements** of what students should know and be able to accomplish. For example, in the Reading content area, one Concept is to employ strategies to comprehend text. Performance Objectives are specific **measurable statements** beginning with an action verb to identify what students should know and what skills they should be able to accomplish. For example, in the Mathematics content area, one Performance Objective is to express the relationship between two variables using tables/matrices, equations, or graphs.

These academic standards were developed by Arizona teachers for Arizona students. Further information about Writing, Reading, and Mathematics Standards; AIMS HS testing; and assessment reports is available on the Arizona Department of Education Web site at http://www.azed.gov/standards.

Components of AIMS HS

The following content areas are covered in AIMS HS:

Writing

Basic and higher-order skills essential for effective written communication are combined in this test. These skills include writing compositions, using conventions of standard English (spelling, grammar, capitalization, and punctuation), and revising writing to improve expression. AIMS HS Writing evaluates specific aspects of writing skills through the use of one extended-response writing prompt.

Reading

As students read fiction and nonfiction passages, interviews, editorials, and articles as part of AIMS HS Reading, they answer questions assessing skills such as reading comprehension, identification of support for main ideas, application of multi-step directions, ability to make and support assertions, and analysis and evaluation of themes. Multiple-choice questions target specific skills.

Mathematics

Real-world topics engage students' interest, provide context, and encourage confidence in their ability to do mathematics. Procedures such as estimation and mental computation are interwoven throughout AIMS HS Mathematics. Reading and interpreting graphs, and principles of geometry and measurement are also assessed.

* * *

AIMS HS Reading and Mathematics contain multiple-choice questions with four possible answer choices. These answers are machine-scored. AIMS HS Writing contains an extended-response writing prompt which allows students to demonstrate their skills in more complex levels of thinking and is scored by a professional staff experienced in providing reliable and consistent hand-scoring.

Using Results

AIMS HS results and reports provide useful information for determining the performance of students in your school and classroom. This guide will also help you prepare for questions from parents, students, and other members of the educational community regarding AIMS HS results.

Each report is designed to present clearly the information most useful to you, to parents or guardians, and to students. The tables on this page and on page 4 show the reports and the quantities of each a school or district will receive.

Sample Reports

Information Included on All Reports

- The name of the test assessment series appears here for easy identification.
- The name of the report is presented here. In this example, it is the Demographic Report.
- This area of the report is reserved for the name of the individual or group taking the assessment.
- The cohort of the individual or group is always included on the report. Each report contains results for one cohort.
- The purpose of AIMS HS is stated here.

The lower part of the left panel of each report provides more specific information about the test and the student or group, and may include the following:

- The test date.
- G The District-School Number and the name of the School, District, and County as appropriate to the level being reported.

Although the individual Sample Reports featured in this document may reflect the results from a single AIMS HS content area, similar reports are generated for all AIMS HS content areas.

Arizona's Instrument to Measure Standards Α В **Demographic Report** C District: ANYDISTRICT D **COHORT: 2008** Purpose Ε The AIMS HS is administered to determine a student's degree of competency in the Arizona Academic Standards for reading, writing, and mathematics. AIMS meets both federal and state assessment requirements. The data derived from AIMS is used to guide instruction and to measure school performance. Highlights of the Confidential Roster Report Detail

- A Identifies the group and cohort. This report is generated at the group and school levels—the sample shown on the previous page is for the group.
- **B** Lists students alphabetically within the group for the cohort tested.
- Provides each student's AIMS Scale Score and AIMS Performance Level within the Mathematics content area. Similar information will also be provided for the Writing/Reading content areas.
- Indicates the test date and identifies the District-School Number, School, District, and County.

Confidential Roster Report Detail with Roster Report Summary (Roster Report Summary)

Highlights of the Roster Report Summary

- Identifies the group and cohort. This report is generated at the group and school levels—the sample shown on the previous page is for the group. The information provided reflects results for Writing and Reading content areas. Similar information will also be provided for the Mathematics content area.
- Identifies the four performance levels ("Exceeds," "Meets," "Approaches," and "Falls Far Below"), showing "Exceeds" and "Meets" as passing.
- Provides and visually depicts the percentage and number of students in the four performance levels within the Reading content area.
- Provides and visually depicts the percentage and number of students in the four performance levels within the Writing content area.
- Indicates the number of students with valid results for the Reading content area.
- Indicates the number of students with valid results for the Writing content area.
- **G** Indicates the mean scale score for the Reading content area.
- Indicates the mean scale score for the Writing content area.
- Indicates the test date and identifies the District-School Number, School, District, and County.

Highlights of the Demographic Report

- A Identifies the district and cohort. This report is generated at the school, district, and county levels—the sample shown on the previous page is for the district.
- **B** Shows the demographic categories.
- c Indicates the number of documents scored in the district as a whole and in each demographic category.
- Indicates the number of students with valid results in the district as a whole and in each demographic category. The number of Students with Valid Results (D) differs from the Number of Documents Scored (C) in that students with no valid attempt, an invalidation, or a non-standard accommodation are not included in the number of students with valid results and are not included in the report summaries.
- Provides the number and percentage of student scores within each performance level for the district as a whole and for each demographic category.
- Provides the number and percentage of students with passing scores for the district as a whole and for each demographic category.
- Indicates the mean scale score for the district as a whole and for each demographic category.
- Indicates the test date and identifies the District Number and the County.

Dear Parents/Guardians:

This report includes the results for the Mathematics portion of the AIMS HS Assessment. Results for the Reading and Writing portion of the AIMS HS Assessment are included in another report.

Assessment results allow teachers to target specific concepts, ensuring that students learn more. The individual scores indicate your student's knowledge and mastery of the Arizona Standards in the content areas of reading,

Detailed information about a student's performance on each concept tested within a specific content area is found under the Strand/Concept Results. writing, and mathematics.

Additional information about the Arizona Academic Standards and performance level indicators can be found on the Arizona Department of Education website at www.azed.gov

Sincerely,

4

Superintendent of Public Instruction Tom Horne

The performance level indicates your student can consistently perform what is described for that level and the levels below. Your student may also be capable of performing some of the competencies described at

the higher levels, but not enough to have reached that level of performance. More detailed performance level descriptors can be found at www.azed.gov.

Highlights of the Student Report (front)

- A Identifies the student and the student's cohort.
- **B** Features a letter to parents/guardians.
- Identifies the four performance levels ("Exceeds," "Meets," "Approaches," and "Falls Far Below"), showing "Exceeds" and "Meets" as passing.
- Provides and illustrates with a bar graph the student's performance level within the performance level range in the Mathematics content area.
- Identifies the strands and concepts in the Mathematics content area.
- Indicates the points possible, points earned, and percent correct for each of the strands and concepts within the Mathematics content area.
- Identifies the student's birth date and the Student Accountability Information System (SAIS) Number.
- Indicates the test date and identifies the District-School Number, School, District, and County.

	Exceeds	Students who score in this level illustrate a superior academic performance as evidenced by achievement that is substantially beyond the goal for all students. Students who perform at this level demonstrate a wealth of knowledge, skills, and abilities in fulfillment of the math standard. They can apply combinations and permutations to solve problems, calculate surface area of 3-dimensional objects, and solve contextual problems using angle and side lengths of triangles.			
	Meets	Students who score in this level demonstrate a solid academic performance on subject matter as reflected by the math standard. Students who perform at this level are able to differentiate among subsets of the real numbers, solve a system of linear equations algebraically, and write the equation of a line using points, slope or the graph of the line. They can calculate volume of 3-dimensional objects, identify a valid conjecture, and determine probability in contextual situations.

Highlights of the Summary Report

- A Identifies the school and cohort. This report is generated at the school, district, and county levels—the sample shown on the previous page is for the school.
- B Identifies the state, county, district, school, and groups that participated in the assessment.
- Indicates the number of documents scored by state, county, district, school, and group.
- Indicates the number of students with valid results by state, county, district, school, and group. The number of Students with Valid Results (D) differs from the Number of Documents Scored (C) in that students with no valid attempt, an invalidation, or a non-standard accommodation are not included in the number of students with valid results and are not included in the report summaries.
- Provides the number and percentage of student scores in the four performance levels within the Mathematics content area by state, county, district, school, and group.
- Provides the number and percentage of students with passing scores within the Mathematics content area by state, county, district, school, and group.
- Indicates the mean scale score by state, county, district, school, and group.
- Indicates the test date and identifies the District-School Number, District, and County.

Highlights of the Confidential Concept Performance Report

- A Identifies the school and cohort. This report is generated at the group and school levels—the sample shown on the previous page is for the school.
- B Identifies the strands and concepts for the Reading content area.
- Identifies the six traits of effective writing for the Writing content area.
- Indicates the number of points possible for each strand and concept within the Reading content area and for each trait within the Writing content area.
- Indicates the mean points for the group for each strand and concept within the Reading content area and for each trait within the Writing content area.
- Provides the points earned by individual students, listed alphabetically, for each strand and concept within the Reading content area and for each trait within the Writing content area.
- Indicates the number of documents scored and the test date and identifies the District-School Number, District, and County.

Highlights of the Summary Concept Performance Report

- A Identifies the school and cohort. This report is generated at the school, district, and county levels—the sample shown on the previous page is for the school.
- B Identifies the strands and concepts for the Reading content area.
- Identifies the six traits of effective writing for the Writing content area.
- Indicates the number of points possible for each strand and concept within the Reading content area and for each trait within the Writing content area.
- Indicates the mean points for the district for each strand and concept within the Reading content area and for each trait within the Writing content area.
- Indicates the mean points for the school for each strand and concept within the Reading content area and for each trait within the Writing content area.
- Indicates the mean points earned by the group, listing individual groups alphabetically, for each strand and concept within the Reading content area and for each trait within the Writing content area.
- Indicates the number of documents scored and the test date and identifies the District-School Number, District, and County.

Glossary

Forms

Different versions of a test that measure the same standard.

Item

One of the assessment units, usually a problem or a question, in a test.

Mean

An average, calculated by adding the values of a set of scores and dividing by the number of scores in the set.

Multiple-Choice Item

A question or incomplete statement that is followed by answer choices, one of which is the correct or best answer. Also referred to as a Selected-Response Item.

Performance Level

A score that measures a student's current acquired knowledge and skills in a particular content area (e.g., writing, reading, or mathematics).

Scale Score

Scale scores provide a standard range for reporting assessment results that permit direct comparisons of results from one administration to another. Scale scores are reported as three-digit integers for the AIMS assessment.

Selected-Response Item

A question or incomplete statement that is followed by answer choices, one of which is the correct or best answer. Also referred to as a Multiple-Choice Item.

Six-Trait Analytical Writing Rubric

A rubric that identifies and evaluates six traits, or characteristics, of effective writing on a six-point scale, with 6 as the highest score and 1 as the lowest. Student work produced for the AIMS HS extended-response writing prompt is scored using this rubric.

Standard

Writing, Reading, and Mathematics are the three standards being assessed. Each content standard can be broken down into three levels:

Strand—an identified subset of a content area

Concept—a broad statement or description of the knowledge and skills in a particular content area

Performance Objective—a measurable statement of desired knowledge and skills presented as a goal for student attainment

Standardized Test

A test administered in accordance with explicit directions for uniform administration.

Arizona AIMS High School Fall 2007 Administration Additional Scoring Services Order Form

1) Customer Information. All reports for the schools and the district are shipped to the "Ship To" address. Complete the "Bill To" field if the information is different from the "Ship To" information.
